

ELECTRONICS RECYCLING IS OUR DNA

**JACOMIJ ELECTRONICS
RECYCLING**

Member of ◀ JACOB METAL GROUP

Jacomij operates internationally in the recycling of **Waste Electrical and Electronic Equipment (WEEE)**. Since 1969, Jacomij has built a worldwide reputation as a leading company within the recycling industry. With a modern facility of approximately 35,000 m² and decades of experience, we are able to process electronics in an efficient and sustainable manner. Fully compliant with legally required WEEELABEX/CENELEC standards. In this way, we aim for the availability of valuable raw materials for future generations.

RESOURCES ARE LIMITED, OUR IDEAS ARE NOT

At Jacomij, we closely follow innovations and trends regarding electronics recycling so we can constantly improve and adapt our recycling process to the latest developments.

SMARTPHONES

WEEE

OVERSTOCK

DESTRUCTION WITH CERTIFICATE

Jacomij is specialist in the confidential destruction of electronics. These often high-quality products are carefully stored and destroyed in fully secured warehouses with permanent camera surveillance. The material is stripped of packaging prior to destruction to ensure an optimal recycling process. Destruction is followed by report and/or certificate of destruction, fully tailored to customer requirements.

TREATMENT UNDER CUSTOMS SUPERVISION

Thanks to our PCC service (processing under customs control), goods that have not yet been customs cleared can be stored and destroyed under supervision at Jacomij. In this way, the supplier saves on import costs & administrative operations.

RETURN LOGISTICS & EXCESS INVENTORIES

As logistics center, you want to dispose of returned goods and overstock in an efficient way with the purpose of creating added value. Jacomij is specialized in the sustainable recycling of electronics products that no longer represent a commercial value. By recycling these products, you contribute to the recovery of valuable raw materials.

CIRCULAR PARTNER IN SUSTAINABLE RECYCLING

Jacomij has the expertise and first-class facilities to recycle electronics in an efficient and high-quality manner, fully tailored to the customer needs.

Thanks to high qualified staff and professional partners, all materials are sorted and processed quickly and with utmost professionalism.

Professional advice and prompt price quotations in accordance with current market conditions

Easy access due to central location in the Netherlands

Logistic support for (International) transport and notification requests

Facility for transport by water, located by the Amsterdam-Rhine Canal

High-quality recycling in accordance with the legally required WEEE/CENELEC standard

Shredder capacity

Confidential destruction

Prompt receipt and approval report and settlement

QUALITY WARRANTED THROUGH OUR CERTIFICATES

JACOMIJ IS PART OF THE JACOB METAL GROUP

In the world of metal recycling, expertise and passion are essential. Seven specialized companies - some with more than 400 years of metal recycling expertise - formed the powerful Jacob Metal Group with the aim of leveraging their unique knowledge and experience. All companies are different, but they are all equipped with unique skills and deeply rooted in their home regions.

Drawing on our extensive strengths, we set milestones among our international competitors. As one of the world's leading family-owned companies in the metal recycling and metal trading sector, the Jacob Metal Group is now an independent European group of companies that is tackling one of the greatest challenges of all time: **ensuring the availability of raw materials for future generations in a sustainable manner.**

At locations throughout Europe, the Jacob Metal Group employs nearly 1,000 employees. They work in a total area of more than 1,000,000 square meters. Our range of services extends from conventional metal trading to the recycling of complex industrial residues in state-of-the-art recycling plants. Our highly qualified professionals have access to advanced facilities, handling systems and analytical technologies.

100% SUSTAINABLE

€ 700.000.000 TURNOVER

300.000 TONS RECYCLED MATERIALS

400 YEARS EXPERIENCE IN RECYCLING

SUSTAINABILITY AWARD

For our valuable contribution to climate protection, the Jacob Metal Group has been awarded with the German Sustainability Award 2023.

“
RESOURCES ARE
THE BASE FOR
OUR FUTURE.
CONSERVING THEM IS
WHAT DRIVES US.”

Siegfried Jacob

For us, there's no waste, only raw materials

We stand for safe and environmentally friendly recycling of non-ferrous metals and electronics from trade and industry. Through professional processing, we turn them into valuable, recycled raw materials so that they can be returned to the circular economy.

Resources are limited, our ideas are not

By consistently expanding our ability to recycle, we are advancing sustainability to counter the global extraction of limited natural resources. All our concepts are based on the almost unlimited recyclability of non-ferrous metals and electronics waste. We ensure the availability of valuable raw materials for future generations.

PEOPLE ARE OUR MOST VALUABLE RESOURCE

The health and safety of our employees is top priority. Not only within the organization, but also in the community in which we operate, we care for a wider impact.

As a leading employer in the region, Jacomij shows its local commitment by supporting activities and initiatives with a strong social & societal character.

CORPORATE SOCIAL RESPONSIBILITY

To maintain a prominent position in the recycling market, we innovate constantly and keep product range, processing methods and services at top level. We continuously invest in environmentally friendly and socially responsible business operations.

All locations are equipped with liquid-proof floors and air purification systems that meet the highest quality requirements. In addition, our roofs are equipped with solar panels, making Jacomij self-sufficient in energy and at the same time delivering back to the net.

CO₂ - REDUCTION

Recycling of metal and electronic waste is active climate protection. Recycling reduces carbon emissions by millions of tons per year. Since the industrial sector must continue to reduce CO₂ - emissions in manufacturing, it will also increase its use of recycled materials.

WEEE LABEL OF EXCELLENCE

Jacomij meets the highest standards regarding the collection, dismantling, recycling and processing of electronics waste. In 2015, Jacomij was one of the first to obtain the WEEE Label Of Excellence. The European label and WEEELABEX certificate not only emphasizes compliance with environmental regulations, but it also shows that Jacomij actively contributes to sustainability and circular economy.

READY FOR THE FUTURE

As a pioneering company, we are ready for the future. We invest in the growth and development of our employees and offer internal and external training opportunities. In this way, we give our employees the opportunity to improve their qualities and skills and achieve new competences.

At Jacomij, we do not only support professional growth but also attach great importance to the well-being of our employees. Therefore we offer an exciting workplace and a home for a solid team where social events are regularly organized.

“

Each day, our dedicated team aims to ensure the satisfaction of our customers. In a time where various modern communication methods are available, personal contact is top priority to us. This results in valuable and long lasting collaborations as well with our customers as with our team.
